EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (CSE)	S.V. National Institute of Technology	7.22 (Current)	2023–Present
Senior Secondary	Central Board of Secondary Education	79%	2023
Secondary	Central Board of Secondary Education	90%	2021

PROJECTS

- **MicroState – Real-Time Market Microstructure Analytics** 2026
Python, FastAPI, Next.js, Supabase, Docker Live Demo
 - Engineered a real-time system reconstructing Level-2 limit order books with event-driven microstructure analysis achieving 1-second latency on cryptocurrency data streams; implemented multi-timescale ML architecture with **92% prediction accuracy**.
 - Created full-stack dashboard with React and FastAPI supporting 100+ concurrent users via WebSocket streaming with real-time visualization of 15+ market metrics; containerized with Docker handling **50+ requests/second**.
- **Ordimus Bot – Gesture-Controlled Pick and Place Robot** 2025
Python, MediaPipe, OpenCV, PySimpleGUI, Arduino GitHub
 - Engineered real-time gesture pipeline using **MediaPipe Hands** to extract 21 hand landmarks per frame; classified 6 distinct gestures with **90% accuracy**, mapping landmark coordinates to servo angles via a custom **OpenCV** preprocessing stage.
 - Built a **PySimpleGUI** dual-mode control interface with 6 live servo sliders, teaching-and-playback mode, JSON pose import/export, and a full event log; serial command dispatch over USB achieved **160–180 ms** end-to-end latency and **88%** pick-and-place task success.
- **SentiStock AI – Stock Sentiment Analysis and Prediction** 2025
Python, NLP, Machine Learning, Transformers Live Demo
 - Constructed machine learning pipeline processing 500+ financial news articles daily using transformer-based sentiment analysis achieving **87% classification accuracy** for automated market trend prediction.
 - Implemented real-time data ingestion forecasting price movements with **78% directional accuracy**, delivering actionable insights faster than manual analysis approaches.
- **Vaani – Speech-to-Text Summarizer** 2024
PyTorch, HuggingFace Transformers, Librosa, Gradio GitHub
 - Architected an AI platform integrating Automatic Speech Recognition, real-time translation, and abstractive summarization for Indian languages; achieved **94% transcription accuracy** on Hindi and English audio.
 - Deployed interactive Gradio web interface currently processing 100+ audio files; multilingual support for Malayalam in active development.

SKILLS

- **Programming Languages:** Python, C, C++, Java, JavaScript, MySQL
- **Tools / Frameworks:** PyTorch, OpenCV, MediaPipe, HuggingFace Transformers, NumPy, Pandas, MERN Stack, NextJS, FastAPI, Docker, Kubernetes, REST APIs, Framer Motion
- **Additional Skills:** Teamwork and Project Management, Effective written and verbal communication

KEY COURSES TAKEN

- **Computer Science:** Data Structures, Algorithms, Database Management Systems, Computer Networks, Operating Systems, Object Oriented Programming, Compiler Design, Machine Learning, Artificial Intelligence, Social Network Analysis
- **Mathematics:** Linear Algebra, Discrete Mathematics, Probability & Statistics
- **Business:** Professional Ethics, Economics and Business Management(PEEBM), Innovation, Incubation and Entrepreneurship(IIE)

ACHIEVEMENTS

- **Runner-Up in Genesis 2026** organized by Cutting Edge Visionaries (CEV), SVNIT.
- **In Gold League** during the Google Cloud Study Jams 2024 & 2025.
- **Among the Top 5%** in NPTEL course – Privacy and Security in Online Social Media.
